

MELTDOWN DRILL DUBLIN

3:00pm Central Bank, Dame St, Dublin
9th March 2002

BRING Gas Masks Banners Radiation Suits Noise and Colour

STOP radioactive discharges into the Irish Sea

MOX is a political, economical and environmental nightmare

stop the commissioning of this dangerous
plutonium plant before its too late

MOX angers her neighbours and threatens their security

A major step backwards for
environment and international security

Safety records had been systematically falsified

The £470m development, on the Cumbrian coast
opposite Ireland, breaks international
laws on sea pollution

People in Ireland regarded the development
in Sellafield as "an unfriendly act by the
British government

against the Republic of Ireland
Sellafield is Responsible for gross discharges and
historic Enviromental contamination
