**The long delayed launch of Ruffcuts
blaggable CDs**

THE NEWS YOU DON'T SEE ON THE NEWS

This blaggable alt-media CD is designed to put activist images into the public domain. This is a physical project to give the widest range of people the tools to distribute their own media. It is physical in the sense that it brings real people together in real spaces for interaction through public screenings. It is a dis-organized network of free groups and individuals where anyone can be both a screener and a distributor.

£3/£2 Entrance - No one turned away who cannot pay
