

YOU ARE NOT IN A TERRORIST AREA YOU WILL NOT BE BOMBED

Unlike the population of Lebanon & Gaza

Israeli war planes have been dropping leaflets like this one on the population of the Lebanon telling them they must flee their homes or risk being killed for being in a “terrorist area.”

Meanwhile the Israeli armed forces bomb bridges and roads and have killed many of the refugees they themselves have caused.

By using overwhelming military force upon civilian areas and the Lebanese infrastructure Israel is not defeating terrorism but creating a new generation of hatred. State terror is not a solution to the crisis but its cause.

The US have given the nod to the Israeli state to do as it pleases. This risks an escalation of the war which may spill over into attacks on other Middle Eastern countries - widening the circle of death and destruction.

It is the Israeli troops who should evacuate from the Lebanon and Gaza, not their populations, with an immediate ceasefire and a lifting of the naval blockade on Beirut.
