

THE LONDON GUANTANAMO CAMPAIGN & BRENT STOP the WAR

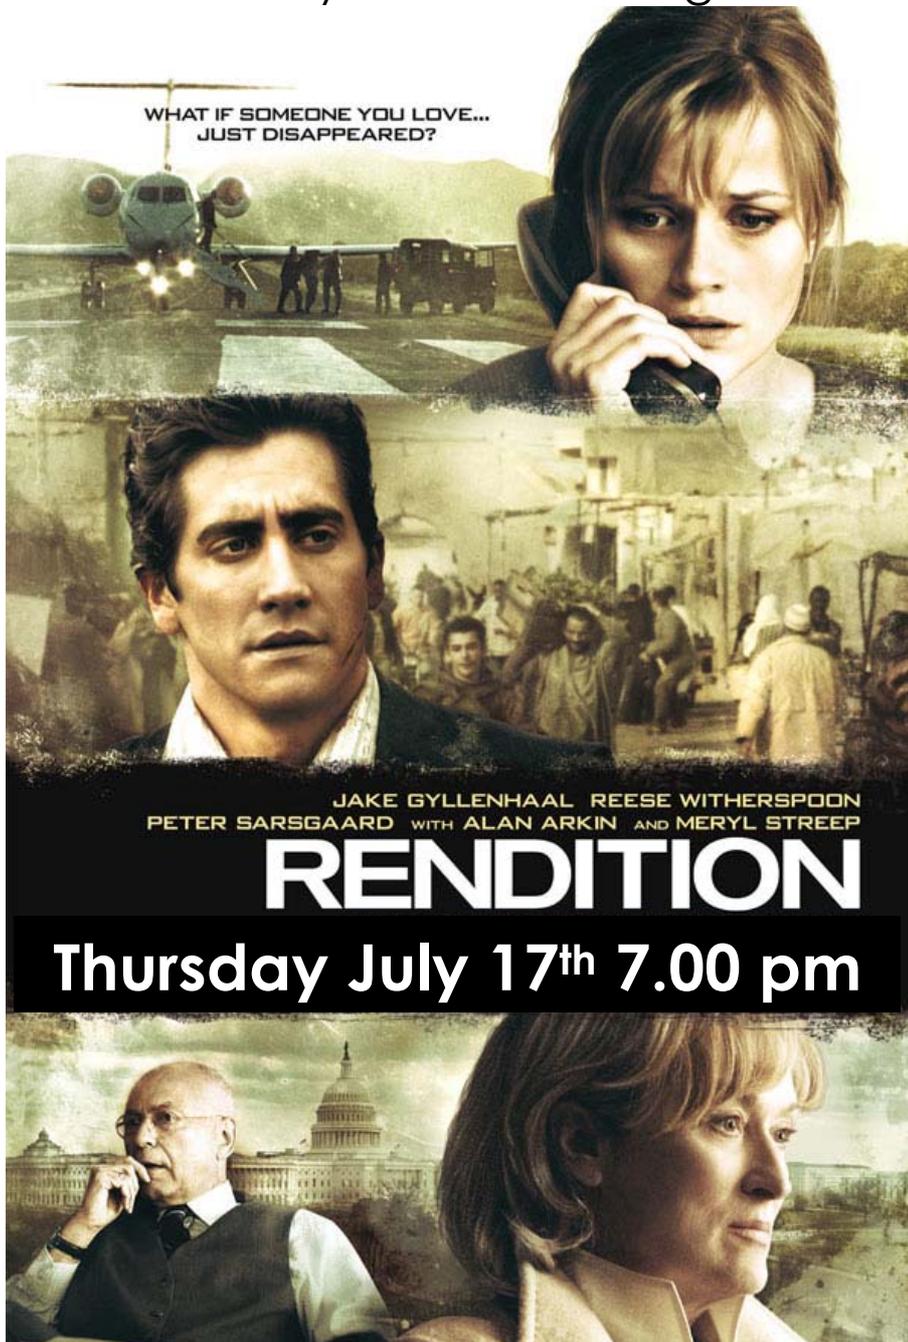

Invite you to a showing of the Hollywood film

RENDITION

Andy Worthington, author of *The Guantánamo Files* and a member of Reprieve, the legal charity that represents many Guantánamo detainees, will introduce the film and lead the discussion after it.

"The film *Rendition* is a thriller about an innocent Egyptian-American family who fall victim to the US government's criminal policy of "extraordinary rendition" - the kidnapping of people suspected of terrorism, their detention without trial and their torture in secret overseas prisons, so-called "black sites". It is the story of a great democracy brought low by evil men.

Watch this film. It brings home the lawlessness and inhumanity of the so-called war on terror." **Peter Tatchell**
