

On Friday, October 31, 2008, the North American Earth Liberation Front Press Office (NAELFPO) re-opened...

Originally founded in the year 2000, the NAELFPO exists to report on the covert actions taken by the Earth Liberation Front and other groups and individuals in defense of the environment.

The Earth Liberation Front (ELF) is an international, underground movement consisting of autonomous groups of people who carry out direct action in defense of the planet. From 1996 through the current day, the ELF has committed dozens of actions throughout the United States, Europe and Canada against developers, logging companies, genetic engineering research and companies, ski resorts, SUV dealerships and more. The damages inflicted to these companies and government agencies have totaled well over \$150 million. Since the year 2000, the FBI has categorized the Animal Liberation Front (ALF) and ELF as number one domestic terrorist threats in the United States.

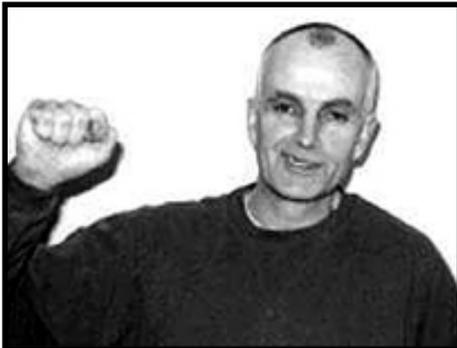

FIGHT SPECIESISM!

ISSUE 7

In memory of Barry Horne...

Barry Horne was an animal liberation activist who died in a UK prison hospital on November 5 2001. He had been sentenced to 18 years in prison for various acts of sabotage and arson attacks, mainly against companies involved in vivisection. In prison he went on hunger strike several times in protest against government support for the vivisection industry, and their broken pre-election promises about animal experiments. The third of these hunger strikes lasted 68 days, and Barry never fully recovered.

His actions generated worldwide publicity, and initiated a huge upsurge in animal liberation activity, the effects of which are still being felt even today.

BARCLAYS GLUED SHUT

To increase the pressure against Huntingdon Life Sciences and the New York Stock Exchange, ALF volunteers glued shut a Barclays Bank in the west [UK]. Dump HLS and the NYSE to stop the sabotage.

For Barry Horne

BOAR LIBERATED

On Nov. 5, 2001 Barry Horne gave his life for animal liberation. Seven years later we, a group of activists, continue his fight through direct action. In the early hours of November 5, 2008 with bolt cutters we broke the padlock of the estate of a society of hunters in the village of Vizcaya. They had a boar caged inside waiting to be killed. We opened the gate and released him. Each year in Euskadi, [Spain] hunters kill tens of thousands of animals. We have saved one. It may sound insignificant, but he has found freedom.

Anyone can carry out sabotage and liberations. Do not look for a leader to propose it to you, just do it! F.L.A.

UPRISING IN GREECE

From December 6, when police murdered 15-year-old Alexandros Grigoropoulos in downtown Athens, to the time of this writing, Greece has seen unprecedented rioting. Anarchists and students, supported and often joined by significant swaths of the population, have clashed with police, destroyed corporate and government property, and occupied government buildings, trade union offices, and media outlets, not to mention the usual universities. By December 12, police had used over 4600 capsules of tear gas, and were seeking more from Israel and Germany—an ominous pair of nations, when it comes to repression.

WHO ARE WE?

Antispeciesist Action is a collective of militant antispeciesists and animal rights activists committed to confronting animal abuse, suffering and exploitation of non-human beings through the use of direct action.

We believe in the 'No Compromise' philosophy, veganism and actively support the Animal Liberation Front (ALF) and animal rights prisoners.

We are opposed to capitalism and the state, understanding that without both entities, the universal exploitation of animals would not be possible.

8 HENS RESCUED

Prepared and determined activists of the Frente de Liberación Animal - Comando Verde Negro (FLA-CVN) took to the streets November 5 to remember the struggle and fight of our compañero Barry Horne. We had been thinking about visiting another target when suddenly a truck that was transporting chickens for slaughter was ahead of us. Inside a building the killers were crowding animals into small boxes to later bring them to a certain death; in a spontaneous action, in anger, not caring whether we were discovered, we quickly snatched from the truck 8 hens and carried them to freedom. With this liberation and other acts of sabotage throughout this year of direct action in Mexico, we showed the exploiters that the

struggle of our fellow fighter Barry has not ceased and that on the contrary it is increasing. Barry Horne, an inspiration for the ALF and other groups in Mexico and throughout the world. FLA-CVN

POULTRY COMPANY...

On November 6 in one of the many establishments of the murderous company Bachoco, we, activists from the Frente de Liberación Animal, had thrown a stink bomb, demonstrating that the subjugation, the enslavement, the torture and the murder stinks of just one thing, death.

Barry Horne continues on with us! FLA Mexico

BURGER KING ARSON

NOVEMBER 6: INCENDIARY ATTACK AGAINST A FAST FOOD ESTABLISHMENT IN MEXICO CITY (D.F.)

In the evening of Thursday, November 6 we painted various slogans referring to animal liberation on the walls and windows of a Burger King; immediately after, a couple of

molotov cocktails were launched at strategic points in this place of capitalism and exploitation. We claim this action as an act of solidarity with the FRENTE DE LIBERACION ANIMAL DE MEXICO for its strong activity and confrontation.

But it was also in memory of an active warrior for freedom: BARRY HORNE...

This week is already a week of action in his memory. Fighters like Barry are remembered as they would like to be remembered: Bringing war without mercy to the exploiters and capitalists.

Against the state and capital
social war!
For freedom ... Until they fall!

Mexico City (D.F.) November 7
2008

FALSE BOMBS IN MEXICO

In a first joint action: an informal coordination of groups and individuals for action and for animal and earth liberation, between 4 and 5 in the morning of Friday, November 7, 10 'Bonanno devices' (these are: false bombs, molotov's, incendiary devices... that in this case were 10 false bombs) were placed at the seats of capitalism and exploitation.

Those that received this warning were: Burger King's, McDonald's and K.F.C..

In addition to being a sabotage against the exploitation of flora and fauna, the second purpose of this action was to create 'nervousness and paranoia in the institutions of the repressive state', and to break the imposed social order, since those who defend capitalism also defend animal exploitation.

In this decentralized action the 'Bonanno devices' were distributed in different areas of the State of Mexico and Mexico City.

The informal coordination of groups and individuals for action

HENS LIBERATED IN CZECH

Five young hens were liberated from battery cages on the 6th of November and given a new home full of sun and fresh air. They can spend the rest of their lives in this better, beautiful home and be free. This action is dedicated to czech activist and open rescuer Michal Kolesar. 'for the animals' 'Animal liberation activists' Czech

FIRE FOR CHICKENS - ITALY

Excerpts: "Incendiary devices have been left near cars (one of them a Porsche) owned by 'Japan Chick Sexing', a company specialized in sexing chicks. This is the first ring of a chain of exploitation linking cages, imprisonment, intensive farms, slaughterhouses... This was a night for the chicks... ALF - Fire Group"

PAYBACK IN GERMANY

Excerpts from the ARM [Animal Rights Militia] communiqué:

"On a night in December 7 Novartis executives and lab workers got a visit at home. The head office of Novartis is located in Basel, Switzerland and that's where these cowards work. These scumbags have been trying to hide by living just across the border of Switzerland in Germany. We will track down every single of one of you and make sure you will all get the treatment you deserve... We started our payback time at the house of Martin Morawietz, an executive at Novartis... Next was Matthias Staufenbiel... Juergen Brokatzky-Geiger, executive at Novartis... Barbara Lücker was next... The next house of Volker Brinkmann was quite funny... These 2 murderers of Novartis, Beate Sachers and George Martiny-Baron are neighbors... To finish the night we placed petrol bombs under two cars belonging to Sofia Baron, the wife of George Martiny-Baron who works at Novartis..."

ANIMALS FREED IN PERU

Excerpts from the Individuals for Animal Liberation on the rescue of birds and jungle cats:

"On Friday, November 21 of this year, in the early morning hours, we carried out a direct action and rescue for Animal Liberation in the Parque Zoológico... We want to emphasize as well that liberation through direct action is something we can all be a part of, we do not need special training nor to be part of any organization, just to act with a couple of tools and an attitude open to taking risks in pursuit of the elimination of speciesism and Animal, Human and Earth exploitation, being always clear that race, sex, color, level of intelligence, language, sexual orientation, or in this case species, are not indicators of superiority or inferiority, but individual characteristics. Individuals are deserving of respect on the basis of their own desires and interests, advancing our ethics to a true unfolding of solidarity and egalitarianism... Until all are free..."

BULLRING ARSON IN SPAIN

On the night between Wednesday and Thursday we put incendiary devices in the Cascante (Navarra) bullring. They worked and they were effective.

Bullfighting is a symbol of animal exploitation in which bulls are tortured and killed because there are people who find it fun. But we are against all forms of animal exploitation, and we believe in veganism as a response to such exploitation and as a way of life.

We want to dedicate the action to the bulls and horses who have been tortured, humiliated and murdered in this arena that we have burned.

F.L.A.

(Frente de Liberación Animal)

and for animal and earth liberation is an informal organization of cells and anonymous individuals that actively struggle to abolish exploitation and capitalism. The Frente de Liberación Animal, part of this action, is already being seen as a threat, because in all the newspapers of Mexico the news was about an 'animal extremist group;' we know that stronger battles will come and we are ready to fight them. Those of us who shape this organization claim ourselves: young autonomous, subversive and rebellious, maintaining a permanent conflict against capitalism, exploitation and the state. Not one step back ... against exploitation ... direct action and confrontation!

This action is claimed by: The informal coordination of groups and individuals for action and for animal and earth liberation:

- Animal Liberation Front
- Brigade of Vegan Fighter Barry Horne
- The Angry Vegan Brigade

- Militias for Animal Rights
- F.L.A. Celula 5
- Comando Verde Negro
- Eco-Anarchist Cell for Direct Attack
- Autonomous Circle of Action for Liberation
- September 11 Subversive Brigade

BARRY this action was for you!!!!

10 TURKEYS LIBERATED

Netherlands: In the beginning of november the Animal Liberation Front rescued 10 turkeys from the meat industry. These beautiful animals were being bred to end up as a christmas meal. We saved 10 lives. These animals will never be hurt. These animals will get all the respect, love and warmth they deserve. We dedicate this action to Barry Horne. Untill the last cage is empty!

RABBIT FARM RAIDED

On the eve of Barry Horne's death, a group of volunteers accessed a rabbit 'meat' farm in Berkshire, U.K. This farm used to harbour hundreds of rabbits in the back of converted box lorries, but have recently upgraded their bunny butchering enterprise to four permanent and highly intensive units. Semi-built and set to be filled with hundreds of rabbits, we entered the site and bypassed top security measures.. the key was left in the door! One unit was so full of rubble and electricity cables we almost didn't expect to find any animals in such conditions. Further inspection found rows of cages, many with rabbits inside. All living on wire, many rabbits were blind, had ears missing and were rotting alive inside this windowless hell. Even within a legal system that

legitimises animal abuse, this sicko has still managed to torture animals beyond any legal requirements. The unit was in total disrepair, flooded with a mix of water and excrement, with open electricity wires and strewn with litter. None of the units had ventilation or air conditioning systems, despite being newly built. This farm was an excellent example of what 'animal welfare' means for animals: fuck all. Needless to say we decided to make some legal corrections. After taking several rabbits to safety, who are now recovering in loving homes, we turned our attention to stopping this 'man' filling any more cages with defenceless animals. We cut every empty cage into pieces. Fuse boxes and machinery were glued and filled with expanding foam. Messages were left on the outer walls and doors before we vanished back into the darkness with our newly acquired friends. This action was carried out in the memory of Barry, who continues to be an inspiration to us all despite his death at the hands of the british government.
- ALF Investigations Unit

VIVISECTOR VISITED – USA

Excerpts from the Students and Workers for the Liberation of UCLA Primates communiqué:

“The holidays are coming up and Santa was checking his list twice to see whose been naughty or nice. The name Goran Lacan caught Santa's eye as having done abominable things to small monkeys inside the labs at UCLA. Santa had his elf or in this case, alf, check Lacan's department lab records... When Santa went into his knapsack to pull out his last piece of coal he discovered that there wasn't any left, just a lone incendiary device. Santa thought this was the perfect gift to give a monster like Lacan and placed it under his car...”

SALMON FREED IN SWEDEN

Excerpts from the Swedish Animal Liberation Front communiqué:

“On the night of 21 November more than 100,000 salmon were liberated from two fish farms in northern Sweden. These two fish farms are a part of the huge

Swedish fish farming industry that kills over 5 billion fish every year. In a fish farm, tens of thousands of fish live cramped in net-cages without any chance to engage in their natural behaviors, like traveling long distances... At Näske Lax AB more than 100,000 salmon were liberated by cutting all the net-cages that were holding the fish. A boat motor was also destroyed and some tires slashed. A spray can was emptied painting messages from the DBF.

The farm is not insured and after economic losses of millions of Swedish Kroner, the farmer doesn't think he will be able to open up the business again. The second farm visited the same night was Ålands fiskförädlings, a big floating facility hundreds of meters out in the sea. After rowing out to the facility we cut as many net-cages as possible before dawn, releasing lots of fish. Direct action saves lives! Both by saving individual animals and also by economic sabotage we make it harder and less profitable to continue to torture and kill animals...”

GLOBAL UPDATE

DOG RESCUE - COLOMBIA

In an action of liberation by an autonomous cell of the FLA in Colombia a puppy who was going to be used in vivisection by students of the local university was removed from a stall. We learn, but not in a system that replicates itself ignorantly; death to hierarchy, death to speciesism! Resistance, Anarcho-veganism and Action!
(A)

ALF ATTACKS IN URUGUAY

Excerpts from the Frente de Liberación Animal communiqué:

"In the early hours of the 1st of November the windows of two butcher shops in Montevideo were destroyed. ...We reject exploitation toward humans and also towards other animals because we believe that they are beings who, like us, have the same capacities to exercise their freedom; therefore, to use them for any purpose would be authoritarian...."

ANTI-HUNTING HOLLAND

Excerpt from the Northern Anti-Speciesism Alliance communiqué:

"Seven hunting platforms were cut down with an axe in the northern part of Holland. A car belonging to a hunter who was out killing innocent animals was redecorated and sugar was poured in the fuel tank...These actions probably won't stop these murderers but gives a better chance for the animals to escape..."

NYSE:LSR UNDER ATTACK

ARSON FOR DIRECTOR

Netherlands: "In the night of November 6th we placed 6 explosives under two cars belonging to a employee. a director of NYSE Euronext... NYSE Euronext Bomb Squad"

BARCLAYS BANK PAINTED

"A Barclays bank in Brighton city centre got a new paint job last night [18th November]... We hope they like this new wall decoration which now reads DROP LSR SHARES, SCUM, DROP HLS and ALF repeatedly across walls & windows. – A.L.F."

BRIGHTON ACTION

"While students were staggering around town drunk and eating kebabs we used the opportunity

to visit Barclays and made a deposit into their ATM cashpoints. They are now both rendered out of use with industrial heavy duty glue inserted into their card and money slots. Cut your ties with HLS, Sell your shares in the NYSE - Anti-Capitalist Action Brighton

Goldman Sachs... The colorful windows of Pret have had a funky new design added by etching fluid. Nothing is sacred, No-one is safe - Pret Sketch Crew
GET HLS OFF THE EXCHANGE NOW!"

ARSON FOR EXECUTIVE

Wassenaar, Netherlands: In the late evening of December 19 two cars were destroyed by fire in the driveway of a NYSE Euronext senior executive.

HUNT SABGING NEWS

MOOR SABOTAGE AGAIN

A recent visit to the White Crag Plantation, found just next to Ilkley Moor, led to fencing of a pheasant pen being cut and brought down. This fencing has been recycled following a similar incident, we guess that if you have several pieces of fencing all with large holes, and you use them to cover each other, it makes one solid piece of fence. However, after our last visit this is no more. Two water butts were smashed up and pheasant feeders tipped over and their springs removed. Two bags of pheasant feed were also emptied. After this some nearby grouse butts were toppled.

It is clear that the concern of Councillor Anne Hawsworth over grouse population stretches only so far as to her position in the shooting fraternity. She supports the small bunch of shooting extremists led by Edward Bromet to pleasure themselves over the killing of the artificially managed

grouse, while persecuting other animals that rightfully belong to the moor; and we declare this attitude as disgraceful.

We call for Ilkley Moor to be a haven for wildlife and not a killing zone, demarcated by a few fanatics who wish to boast about their 'pursuits'

The population of grouse across Rombalds moor have been decimated, and any serious walker would testify to that fact,

Stop the Ilkley Shoot.

ALF

“STOP THE SHOOT”

Up on the Keighley road, running up near to Ilkley moor, a can of spray paint was emptied onto the road.

The slogan read:
'Stop The Shoot'

ALF

being given there was no suggestion that any 'home demos' or direct action' had been at Sequani or its workers.

This was a campaign that had 'upset' those that are licensed by the home office to experiment on innocent, defenceless animals and because of that 'upset' I sit here in my cell writing this short recall of how I ended up here.

I've always fought for the oppressed whether human or non human, either by encouraging mutual aid or exposing the truth regarding the way we treat other sentient beings for our own selfish ends.

The support and outrage, inside and outside, continues to be brilliant, from supporters, family and friends and continues to get me through this time of repression.

'If you aren't being effective at changing the world for the better, they aren't interested, if you are, be careful. The Future of the world is in your hands.'

In Solidarity. Sean Kirtley

WHALERS ON THE RUN

Anti-whaling activists on board the Sea Shepherd Conservation Society ship Steve Irwin have intercepted the Japanese whaling fleet on Friday 19 December. The encounter took place in dense fog, ice conditions and winds picking up to 50 knots approaching blizzard conditions.

Sea Shepherd launched an inflatable boat to launch a rotten butter bomb attack on the Yushin Maru No 2, but the inflatable was recalled due to weather conditions. The Yushin Maru No 2 then headed north with the Steve Irwin staying in pursuit of the rest of the Japanese whaling fleet. The whaling fleet has for the moment stopped whaling activities and is running with Sea Shepherd in pursuit.

also have been 'organising' over the telephone. Even though the defendants were friends and friends call each other to chat and socialise. Even if I had been organising demos all were peaceful affairs anyway usually involving a mega phone or two and plenty of placards.

After an 18 week trial where the jury were bussed in from a secret location, the press and other reporters were banned from covering the case, police were 'on guard' outside the courtroom, where supporters were banned from wearing any animal welfare logos on clothing, the merest mention of experiments on animals at Sequani was outlawed. I was the only one to be found guilty of conspiracy after the jury had been out for many days deliberating. My appeal against sentence and conviction was launched on June 20th this year and has yet to be heard.

I was remanded to Winson Green prison in Birmingham on May 14th and sentenced at Coventry crown court on May 30th 08.

The judge called me 'a sinister criminal' who 'has done nothing for my cause' sentenced me to four and a half years in prison and imposed a five year supper ASBO on my release in August 2010 banning me from Herefordshire and from contacting Sequani for the duration. The unlawful action that contravened section 145 SOCPA mentioned during the trial were:

- Lengthy and informative faxes had been sent to suppliers of Sequani during demos, there was no evidence to suggest that I or any other defendants had sent these faxes.
- Aggravated trespass had taken place at demos by defendants (including myself) standing in the car parks of suppliers even though there were police present, also entering buildings but leaving when asked to.
- Sequani workers, and workers of companies that supply Sequani had been 'upset' by the demos also a few neighbours in the vicinity of the lab had been 'upset' by the demos.

During prosecution evidence

NEW GROUP ACTIVE

8th November 2008

Sabs from Gloucestershire were out on Saturday to attempt to stop a shoot at Brimpsfield Park in the beautiful Cotswold countryside. The first shoot of the day saw four sabs stop 5 of around 15 of the shooters who then broke guns and counted their losses. This meant that any birds flying to the left in the valley were able to get away this time. Unfortunately the police were called just as the second shoot started and an Inspector and Sergeant of Gloucestershires cops made threats of arrest using the aggravated trespass card and sections of the Criminal Justice Act to ban us from the area. They didn't take any details from us which so we have decided we will be back very soon.

15th Novemeber 2008

The Cotswold countryside is a hive of shooting activity with sometimes dozens of shoots taking place in a radius of a

couple of miles. We headed to Syde park this weekend to check an area of woodland that had been pegged out for shooters. Sure enough we heard gunshots although not in the area we expected. We spotted a beater five fields across using our binoculars and ran down into the valley ahead of the driven area. Sure enough a line of shooters stood in a small managed clearing at the bottom of the valley. We shouted break guns and most of them did bar two shooters who almost shot a flag that one of us was using to make ourselves visible. As no private property signs were displayed and no red "danger" flag was visible we assumed it was safe to merrily walk in front of these guys... apparently not... When we were reluctant to leave what we thought was a public area Terry became quite angry and shouted and swore at us telling us to "GET OFF MY LAND"... With this the shoot called lunch early and the morning shoot was called off!

**GLOUCESTERSHIRE & COTSWOLDS
HUNT SABOTEURS** 

MINK RELEASED ACROSS THE GLOBE

3000 FREED IN CANADA

According to media reports, early on October 16 approximately 3000 mink were released from La Visonnière Labonté de Thetford Mines, the largest fur farm in Quebec.

Farm director Pierre Labonté told a local newspaper, "Not only did they open the cages and release mink, but they also destroyed their pedigree cards, which is the trademark of anti-fur militants." (The cards contain irreplaceable information about an individual animal's life history.) With the loss of genetic information, Mr. Labonté said the escaped mink are no longer useful for breeding. "We have insurance that protects us against theft, but not against this type of crime," he added and estimated losses at \$200,000.

THOUSANDS FREED - ITALY

November 2, 2008 – Rome: Tonino Sbardella has been ruining the lives of thousands of mink for years inside the 15 sheds of his concentration camp on Mink

Road in San Cesareo (Roma). Inside the farm there were a lot of old cages that have been replaced by new cages, a few centimetres bigger... centimetres we do not care about... We do not want to see any living being inside bigger cages.

Tonight thousands of mink had the opportunity to feel real freedom, made of soft ground and running water to dive in. Someone will say that many of the mink will end up under the tyres of cars, but we ask you: is there so much difference from a life in a cage waiting for a death sentence that has already been decided? We know the answer and tonight we acted, tearing down fences and opening all the cages. This action, for those sharing our ideas, is an invitation to take part in the struggle, acting in this direction and going beyond your fears.

As it has been written on the walls of the farm:

'Freedom cannot be asked for, it can only be taken!'

This farm has been raided at least three times before, in 07, 05 & 98.

LETTER FROM SEAN KIRTLEY

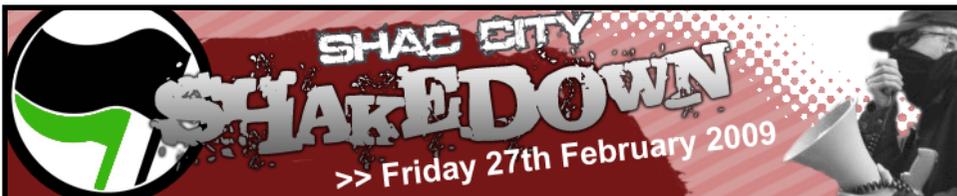

At 7:00am on May 9th 2006 police raided nine homes across the Midlands and subsequently arrested twelve activists over a 48 hour period. The door on my house had been so violently battered that there was only two shards of wood hanging of the remaining hinges. Police arrested me and spent nine hours searching the premises while my partner remained in the house, not pleasant at all. A megaphone, banners, thousands of leaflets, mobile phones, computer, digital camera, clothes, letters, discs were all seized as evidence of my

involvement in the campaign against Sequani animal testing lab in Herefordshire. The others that were raided all had similar property seized.

After being charged and bailed for almost two years the case went to court in January 08 at Birmingham crown court. Seven of us were charged with 'conspiracy to interfere with an animal research organisation' and put on trail.

The bulk of the evidence against me related to the stop Sequani animal testing website, which I ran and my use of PGP email encryption and other privacy tools that were on my PC. It was suggested that I organised demos outside Sequani and companies that did business with Sequani although the SSAT website had a policy of not advertising demos! It was then suggested because of the amount of phone calls between myself and other defendants (phone logs submitted by the relevant telephone providers) that I must

TIME TO SHOW THE ANIMAL ABUSING MONEYMEN THAT TRADING IN BLOOD MONEY IS BAD BUSINESS....

This is a call for action in the heart of London and at the heart of animal abuse. Without the trading of HLS' stocks and shares, and without shareholders, HLS would cease to exist.

HLS' share price has dropped by over 75% in the past month (see graph below), and now is the time to react. Apart from shocking animal cruelty, scientific falsification and employed sex offenders, the New York Stock Exchange now have an extra reason to kick HLS off the stock exchange. HLS are still seriously in debt - having only paid off a fraction of their debt interest and not the debt itself - and are financially unstable. We can reveal this is partly due to having recently lost two major customers.

Militant antispeciesists will be meeting at the Bank of England, 12noon. As we pass several important financial corporations that are directly responsible for keeping HLS open, the march will stop for 5 – 10 minutes per target - so don't forget to mask up for direct action!

2000 FREED IN ITALY

According to a newspaper in northern Italy, someone entered a fur farm in Via Mazzarana (Mercadello di Novi, Modena) early in the morning of November 5 and opened the cages of around 2,000 mink. Some of the mink were recaptured but many are still free in the fields surrounding the farm. The farm was subject to a similar raid seven years ago.

6000 FREED IN FINLAND

We went to a fur farm in Lappajärvi in the night between 17-18.11. We dyed all the 600 foxes of the farm with non-toxic henna, took all the breeding cards and opened all the cages. We liberated the foxes to mess the breeding records, so the farmer won't know which animal was in which cage. This together

with removing the breeding cards guarantees the fact that years of breeding work and information has gone to waste.

We also sabotaged some farm machinery, for example the device that was used to electrocute foxes to death. We also left a message to the farmer on a building: Welcome to work!

EVR

Animals in the farm were in really bad shape. Many of them had bad eye-infections and disformed legs. We also saw a fox in a cage that had been dead for long time. Some of them had gingivitis. Some of the cages were torn and broken so that animals could hurt themselves. Some of the foxes were really fat.

Our message to the fur farmers is this: We will never leave you alone. EVR

1000 FREED IN GREECE

The ALF has claimed responsibility for the liberation of 1000 mink at a fur farm in the town of Siatista. (The area of northern Greece, including the town of Siatista, is a major manufacturing center for the fur industry in Europe.)

INSURRECTION IN MEXICO

ECO-ANARCHIST ACTION

During the week of Tuesday the 25th to Friday the 28th of November, in solidarity with anarchist prisoners in France accused of sabotaging high-speed train lines:

"Half a dozen Molotov cocktails were thrown at installations of the tren férreo (metro rail) in Mexico City, causing damage to roads, electricity poles and walls of facilities. No to metro line 12! Incendiary sabotage against a 'control box of telephone lines,' property of Telmex; the box exploded and hundreds of lines were left unusable, 7 public telephones also owned by Telmex were sabotaged leaving them unusable, 1 public phone burned. In the early hours of the last day, a 'Banamex' bank was sabotaged, leaving the ATM unusable, thanks to the abolitionist fire of a Molotov."

Actions were claimed as: Eco-anarchist cell for direct attack.

LEATHER FAIR DESTROYED

Excerpts from the Militias for the Rights of Animals communiqué:

"...We placed an incendiary device in one of the tents; after 20 minutes the fire burned most of this deviant trade. Shops lined with the skin of horses, cows, snakes. etc., clothes of wool snatched from lambs, jackets made of the skin of murdered pigs and other products were consumed by our anti-speciesist hate... We are not going to respect any authority dressed in blue (PAN), tricolor (PRI), yellow (PRD), red (communist parties), much less black (traditional anarchist authorities), nor any 'revolutionary' leader... For Animal, Human and Earth liberation, radical insurrection!..."

FIRE AT RODEO

Excerpts from the Frente de Liberación Animal - Passion and Rage communiqué:

"...With anger in the gut and molotovs in their hands, activists from the Frente de Liberación Animal-Passion and Rage, took to the streets of Mexico City to demonstrate their rejection of this speciesist society... That's why we set a target: a rodeo, where people have fun at the expense of the suffering of an animal forced to do things that break their natural and wild cycle. But before we arrived at our target, along the way we passed various speciesist businesses; of course we could not hold ourselves back and we had to leave a message of hatred for them... Our main objective, the rodeo where liters of gasoline were poured and lit with the rage of some molotovs; while the fire was burning, our desires to see an end to animal exploitation were burning, but that will not just happen... We will continue helping businesses that profit at the expense of animal suffering close..."

POUND VAN TORCHED

"A municipal dog pound in Mexico State received a visit from the Frente de Liberación Animal - Comando Verde Negro (FLA-CVN) at night when we cut a hole in one of the gates that surround this center of torture and endless murder of hundreds of dogs each year... To end the 'night of dogs' we put an incendiary device in one of the vans in the dog pound, so that it is now unusable..."

BULLRING DAMAGED

"On December 16 we climbed the walls of a bullring that is under reconstruction, in Mexico State, and we found ourselves inside, in that place where dozens of defenseless bulls are murdered and where they had been planning to go back to torturing... Incendiary devices were placed at strategic points in the bullring... We will not tolerate the torture of any animal and we will stop it with sabotage and animal liberation... FLA México"
