

WHY ARE WALKING RIGHT OVER ALL OF US!

DID you know that Boots The Chemist, that High Street shop with which we are all so familiar, is **stealing £86 million a year** from the British public thanks to a tax dodge?

That's right! As exposed recently on BBC radio's File on 4, it sneakily changed its HQ to a post office office box in Switzerland to avoid paying proper UK taxes and is now handing over only £14m a year instead of more than £100m.

Meanwhile, Boots boss Andy Hornby - the former chief of failed bank HBOS, walked away with more than **£2m** in his own pocket for his first **nine months'** work.

It's the same picture everywhere - Big Business is being allowed to get away without paying its fair share of taxes that the rest of us **have** to cough up. And the Fat Cat bosses are laughing in our faces with their massive pay cheques and luxury lifestyles.

This comes at a time when the Tory/Lib Dem government is telling us the country is broke and we've all got to make 'sacrifices'. Thousands of people will be losing their jobs. Vital public services will be cut. Those who cannot find work are to be punished with what amounts to slave labour or the threat of starvation. Only the rich are to be allowed a proper education with the massive hike in student fees. The NHS is coming under attack from privatisation. We are all going to have to work until we drop dead because the state doesn't want to pay us the pension we've earned.

This is not a coincidence! What we are seeing is a deliberate attack on the majority of the population by greedy global Big Business and its friends in the deeply unpleasant Conservative and Lib Dem parties.

We say we have to fight back! The students in London have shown us the way - we have to make it quite clear to the ruling elite that we will not put up with **DAYLIGHT ROBBERY** from Boots or any other Fat Cat criminals!

Join the resistance! Useful local info online at:
