## WHO IS CHELSEA MANNING?

**Welsh-American whistleblower Chelsea Manning** is serving 35 years in a US military prison for disclosures made to and published by WikiLeaks and was tortured while held in pre-trial detention. Manning's revelations included evidence of how illegal CIA renditions and torture were being carried out and covered up with the complicity of many countries, how prisoners who should never have been detained were being held without trial at Guantanamo, how the US failed to investigate reports of prisoner abuse and summary execution in Iraq, how child abuse by US contractors in Afghanistan was covered up, and much more.

Now that we have even more graphic and shocking evidence of CIA involvement in torture with the Senate Report, we are renewing our demands for Chelsea Manning be released from prison immediately.

Along with Julian Assange and WikiLeaks, Manning has performed a great public service and should be thanked for alerting the world to these and other atrocities. There is something badly wrong when those who expose torture are themselves tortured and imprisoned while the torturers and those who cover it up walk free.
